

std::exception

```
classDiagram
    original::noElementError --|> std::exception
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded class box for 'original::noElementError', which is divided into three horizontal sections. Above it is a white class box for 'std::exception', also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the 'original::noElementError' box to the bottom section of the 'std::exception' box, indicating that 'original::noElementError' inherits from 'std::exception'.

original::noElementError
