

std::exception

```
classDiagram
    original::noElementError --|> std::exception
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the 'std::exception' class, divided into three horizontal sections. The top section contains the text 'std::exception', while the two bottom sections are empty. At the bottom is a gray box representing the 'original::noElementError' class, also divided into three horizontal sections. The top section contains the text 'original::noElementError', while the two bottom sections are empty. A blue arrow points from the top of the gray box to the bottom of the white box, with a blue open triangle at its tip, indicating that 'original::noElementError' inherits from 'std::exception'.

original::noElementError
